

Government Solutions Group
Creating Cost Effective Solutions
for your Critical Communications Needs

For over 30 years, Datron World Communications has been the price-performance leader in the manufacture and supply of military and public safety radio equipment to a diverse worldwide customer base. Today, we do business in over 80 countries backed by an international sales representative network and regional support centers. Datron prides itself in providing unparalleled service to our customers and we are unyielding in delivering the best value for your money.

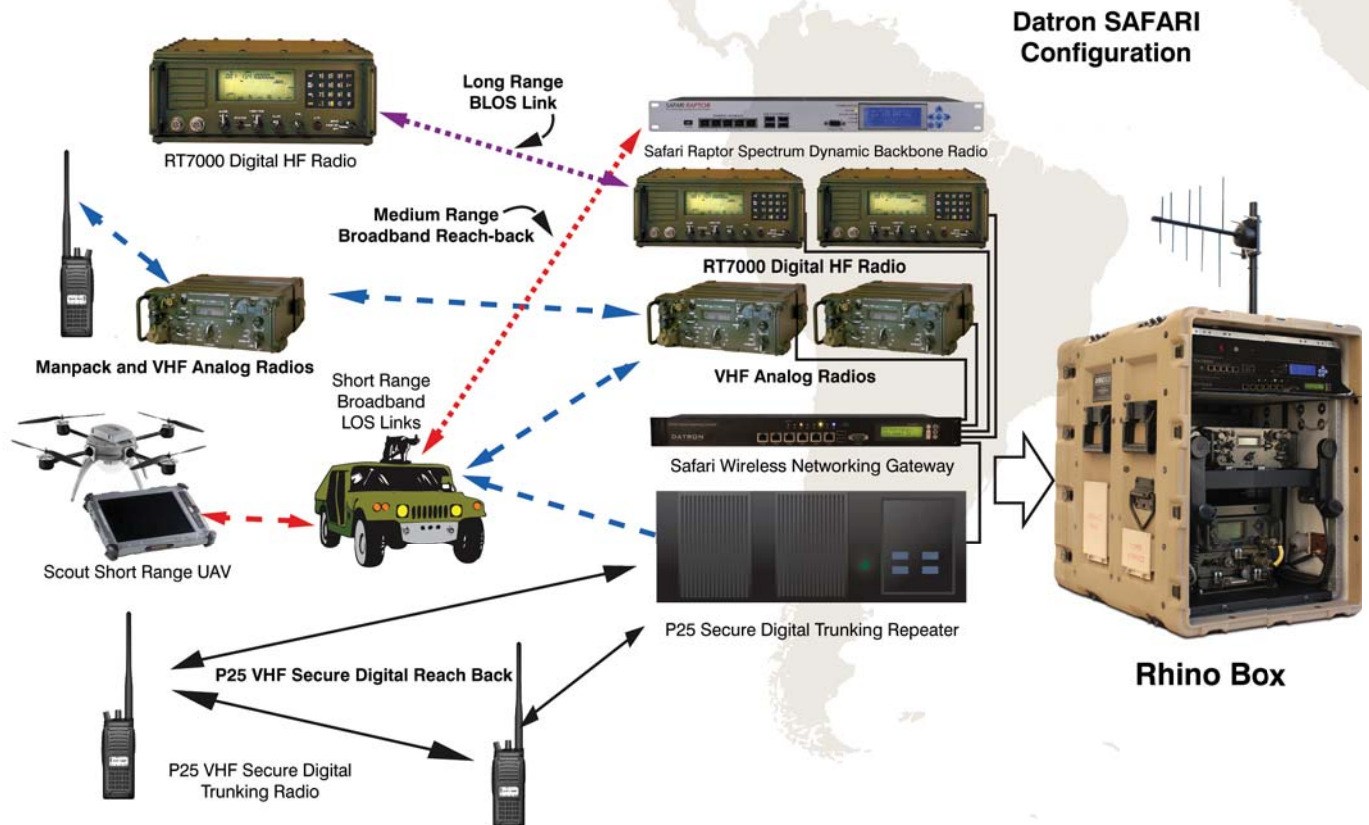

Datron's Government Solutions Group (GSG) has the experience and knowledge to handle your complex communications needs. Working directly with end users and our strategic partners we have designed, implemented and commissioned a wide range of solutions including remote controlled HF Ground-to-Air Systems, Mobile Command and Control Vehicles and innovative Border Security Networks. We are also developing new capabilities and custom payloads for the Datron Scout micro-UAV Vertical Take Off & Landing (VTOL) surveillance platform.

OUR CAPABILITIES

Datron's Government Solutions Group is ready and able to tackle all your project requirements. Our services range from site surveys to project management; engineering design to integration and deployment; pre-project consulting to after sales support. All services are executed in the most cost effective manner possible in an effort to bring you the most reliable and easy to use communications solutions available.

OUR SOLUTIONS

Our Government Solutions Group specializes in the integration and implementation of tactical and public safety radio equipment. When combined with products and services from Datron's strategic partners we are able to deliver value-added or edge solutions to your C4ISR or public safety network.

Active communication coordination

DATRON TACTICAL WIRELESS NETWORKS

The Government Solutions Group has designed and delivered a number of HF and VHF based voice and data systems to our global customers. These systems typically involve Datron-supplied radio equipment combined with existing customer-supplied gear and third party content. We specialize in HF voice and data systems that communicate with naval and airborne assets.

- Custom Configurations
- Split Site Stations
- Ruggedized Tactical Solutions
- Integrated Voice and Data Naval Systems

DATRON SCOUT NETWORK

The Datron Scout is a small, rugged and lightweight Micro Air Vehicle designed to capture and transmit high quality video and images. Integration of the Scout into a secure network is made possible through ScoutNet. This application will connect multiple vehicles and controllers together over an ad-hoc digitally encrypted network. Military, law, fire or civilian – the Datron Scout provides tactical aerial intelligence for your mission needs.

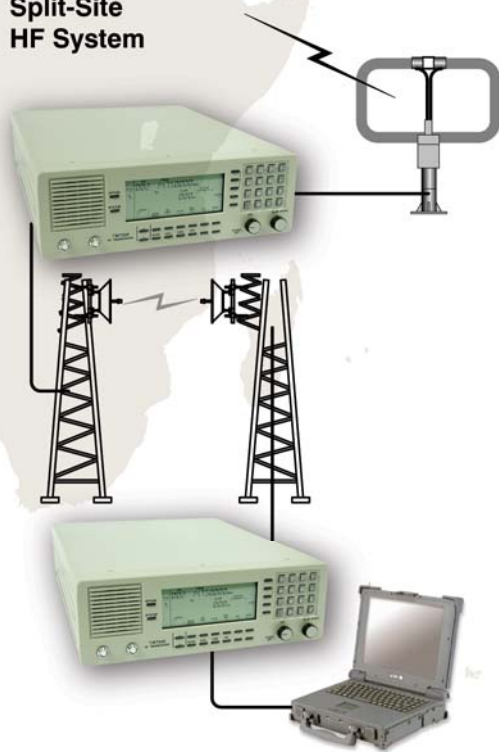

DATRON TACTICAL INTERCOM SYSTEM

Datron's Analog Intercom System (AIS) is a compact intercom system specially designed for crew intercommunications and radio access in tactical vehicles. The Datron AIS is lightweight, rugged and reliable.

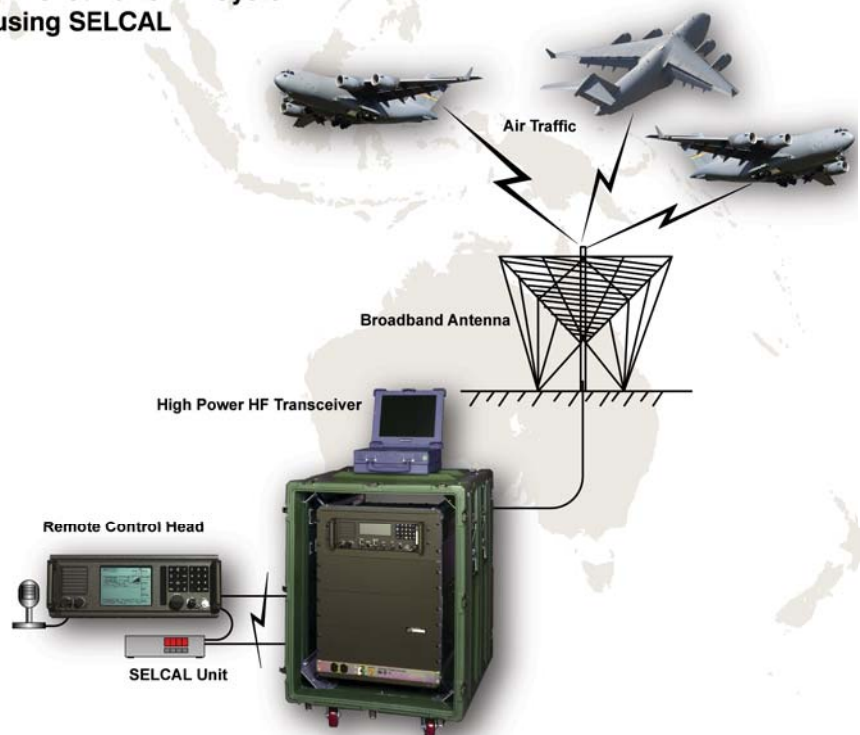

Our Promise

Datron and our Government Solutions Group are committed to serving our customers by providing the most reliable, cost effective and easy to use products and solutions available. We stand behind this commitment and work everyday to earn your trust
